

SOUND TECHNOLOGY

# SAV-C1

The SAV-C1 is a dedicated Centre Channel loudspeaker that has been designed to blend perfectly and seamlessly into Home Theatre systems.

Often regarded as the most important loudspeaker in a Surround Sound system, the SAV-C1 reproduces voice with ease, providing detail and dynamics that belie its size and price.

Cleverly designed to fit unobtrusively on top of or below most Television and Video monitors, the SAV-C1 incorporates Sonique's 2nd generation magnetic shielding that reduces any possible affect on picture quality or performance.

## Centre speaker with realism

The standard model features a rigid 18mm MDF cabinet with soft lines that is finished in easy care textured black, providing a product that is unobtrusive to compliment most decors. Of coarse for a little more, the SE specified Timber version is an option.

Its ease of placement, style and sound are just a few reasons why the SAV-C1 should be your next high performance centre channel loudspeaker.

### Standard Features Include:

- Full range frequency response
- Full magnetic shielding
- 18mm MDF cabinet
- High Quality Oxygen Free wiring
- Gold plated 3 way terminals
- Protective Rubber feet

"a high quality unit that produces natural, articulate and believable sonics."

DVD Now Magazine.
