

SOUND TECHNOLOGY

Thunderbox 1200

Active Subwoofer

The Thunderbox 1200 has been engineered for HI-Fi and Home Theatre systems.

It's fully optioned with features that include Auto turn On, Line level and speaker inputs and outputs as well as high pass filters to match smaller loudspeakers.

This vented design provides extra impact by utilising dual low noise ports, combined with a large forward firing high technology woofer that provides all the impact, speed and finesse required to compliment Home Theatre and Music systems alike.

Also integral to the performance is the unique compression and soft clip circuitry that protects without distortion, delivering long-term reliability at high levels.

Designed to be virtually invisible, the Thunderbox 1200 develops bass sound that is not localised to the subwoofer, but reinforces the total system enveloping the room and your senses.

Standard Features Include:

- 12 inch hi-tech, high power woofer with rubber roll surround
- 25mm MDF cabinet with full bracing
- Low noise ported enclosure
- Compression and Soft Clip protection
 - Auto On/Off
 - Phase Switching: 0/180Deg
